From our Newsdesk

Youth Programs

- One of our flagship programs for the differently abled youth, the Experimental Learning Program (ELP) organized a social event in the month of August. Our program trained interns, adults, and learners, and their parents shared their transformed lives in completing their graduation studies. The event was attended by our corporate and NGO partners like HDFC Bank, NSDC, and Sambhavnan Foundation. We thank all of them for making it a successful event.

- Our campus centre was launched with two programs: Computer Program and Spoken English Program, in association with NITI Aayog and the National Health Mission. With this center, we expect to reach out to the Panvel area more closely. In future, making the campus centers at Panvel and Belapur more active will be a priority. We believe in the power of technology to make the future more inclusive.

- ELP training was held in Mumbai-based organizations. Sajal Shukla, the program coordinator of the Sambhavnan Foundation, Nitya Shankar, and Anil Joshi trained the participants. We plan to organize such workshops in future.

- Employees of Welsfylde conducted a session on ECA for our Computer Program students in Chandigarh. We Thank our corporate partners for sharing their expertise and knowledge with us. Deloitte Bank employees have also taken spoken English classes for our Computer Science students at Chandigarh and Bankura on Saturdays.

Sujaya English Active Learning (SEAL) Program

- This academic year, the SEAL program was launched with an initial investment of Rs 500,000 in Mumbai. We are happy to report that the program is running smoothly.

- Our campus centre in Panvel, Maharashtra, was launched in August. We are happy to report that the program is running smoothly. We are looking forward to more such programs in future.

- Our campus centre in Navi Mumbai, Nagpur, and Bhopal has been established. The program is being implemented in these centers.

- Level tests were conducted at 7 SEAL centers in the months of July and August. These tests are conducted by us to assess the knowledge of the students. These tests included all the aspects of language, learning, and speaking.

SEAL Centre in Bhubaneswar

Our SEAL centre in Bhubaneswar is essentially a mobile one and we are currently partnering with Sunflower Foundation. Through this centre, we are reaching out to and impacting more than 500 students from grades 3 to 6.

SEAL Centre in Chennai

We are pleased to announce that our SEAL centre in Chennai has been established. This centre is well-equipped and staffed with experienced trainers.

SEAL Centre in Chandigarh

Our campus centre in Chandigarh is currently training 40 students. Among them are Arya, Shilpa, Nitin, and Shubh. These girls are from a minority community who came to learn Computers at the centre. These girls belong to a community where a girl's education is a little important. There is a lot of resistance among the members of this community to allow the girl's child to study and become employable.

The girls of our center revealed how they convinced their parents by showing the benefits of being computer literate. Eventually, their parents gave in and allowed them to join our program. We applaud the spirit of these young learners.

Etcetera

- We have launched our campaign page on Facebook, which is the world's largest professional network. You can now follow our organizational updates and check out our current openings by clicking on https://www.facebook.com/sujayafoundation.

- Our annual school level called SEAL Live! Gujarat and Rawat will be held in the month of November. True to its name, the event aims to give the SEAL students a platform to showcase their talent and explore other activities.

- By July next year, at least 5 SEAL centers will be established in Mumbai, 4 in rural areas, and all international airports will be made accessible to people with disabilities. The government has claimed as part of its ambitious drive to make India more accessible for the differently abled - NDTV, 1pmb.com.

- Transmedia has launched StoreWise, an open source platform for India's rural children's education. The platform hosts thousands of stories in languages from across India and beyond. Visit www.storewise.org for more details.
